

ARYA ACHARYA

Bangalore | +91 78925 63754 | B.Tech. Graduate (2026) **seeking full-time** roles

Portfolio: <https://aryakenway.github.io/Personal-Portfolio/>

LinkedIn: <https://www.linkedin.com/in/arya-acharya> | GitHub: <https://github.com/AryaKenway> | aryaacharya2500@gmail.com

SKILLS

Proficiencies: Game Development and Design, Design Patterns with SOLID Principles, UX Research, Interaction Design, SQL, Microcontroller Programming, UI/UX Design, Level Design, Particle Effects, Shader Graphs, Documentation, AI-Based Workflow and Product Design, CI/CD Pipelines, DevOps

Tools: Figma, Blender, Unity, Unreal Engine, Arduino IDE, MySQL, PostgreSQL, Autodesk Tinkercad, Git, .NET Framework, Docker, Selenium

Programming Languages: C#, Java, C, HTML5, CSS

POST-DEGREE EXPERIENCE

Walmart Global Tech India - UX Designer Intern

March 2026 - Present

- Designed interactive prototypes for an analytics dashboard for site merchants, enabling data driven decisions to improve sales, customer experience, and product visibility, extensively leveraging LLMs
- Designed an AI powered Item Intelligence dashboard, providing merchants with a comprehensive 360-degree view of every product across the catalog
- Interpreted Figma designs to responsive web pages using React, Tailwind CSS, and AI-assisted Figma-to-code MCP workflows
- Conducted heuristic evaluations and UX research to identify usability issues and recommend design improvements that enhanced the overall user experience
- Led the planning and execution of neurodiversity and accessibility awareness events for Walmart

PRE-DEGREE EXPERIENCE

Red Panda Games Studio - Game Developer Intern

Feb '24 - April '24 and Nov '24 - June '25

- Worked with shader graphics and particle effects to enhance visual elements in the project
- Refined the game's UI to ensure a clean, intuitive, and user-friendly interface layout
- Fine-Tuned troop and building interactions by adjusting hit points, counter mechanics, and damage values to ensure balanced gameplay
- Spearheaded case studies on relevant industry games and documented key design elements and mechanics that could be effectively adapted and implemented
- QA tested games and conducted regression testing to report bugs and improve user experience
- Contributed to game dialogues and storyline development, enhancing the narrative experience

Stipe Solutions Private Limited - Augmented Reality Researcher Intern

April 2025 - June 2025

- Researched AR development using Meta Quest and Unity, focusing on real-time interaction and user experiences
- Implemented a simple integration where user inputs from a phone were enhanced with hand gestures and overlay elements using Microsoft ClipChamp

Hitachi India Private Limited - Software Engineer Intern

April 2024 - June 2024

- Implemented stack and queue data structures in Unity
- Made a live weather forecast project using Weather Api
- Exported and tested models in Unity and Blender

PROJECTS

Discord Rich Presence - YouTube Music

Syncs YouTube Music playback to the Discord status through a Node.js bridge and a browser extension

- The system performs live synchronization of song titles and artist names
- It includes a smart timer that calculates elapsed and remaining playback time

JoPolik - The Super Experience

Developed an educational multiplayer game combining 2D platforming and 3D exploration

- Integrated Photon PUN networking, player animations, NPC interactions and reward mechanics for player engagement
- Implemented DSA-based question system with progression and procedural world generation for replayability

VSS - Visualization of Search and Sort Algorithms

Developed an interactive Android application in Unity to visualize searching and sorting algorithms

- Implemented animated visualizations for Radix Sort, Merge Sort, Tree Sort, Linear Search, Jump Search, and Tree Search using C# and DOTween
- Integrated real time execution metrics, Text to Speech explanations, and audio-based feedback to improve algorithm understanding and learning experience

EDUCATION

Degree	Institute	Year	Grade
B.Tech. in Computer Science	Christ University, Bangalore	2026	8.76
Pre-University (PCMC)	Christ Junior College, Bangalore	2022	80%
Class X	PPEC, Bangalore	2020	93%

SCHOLASTIC AND CO-SCHOLASTIC ACHIEVEMENTS

- Secured **95%** in Computer Science (PUC); Secured **Distinction** in 5th and 6th Semester (B.Tech.)
- Finalist in Gen AI Hack Fest 2025 organized by CMR Institute of Technology
- Secured 1st place in Battle of Brains (Dept. of CSE); Runner up in All-Style Hip Hop Battle organized by Battle Rockz
- Secured Black Belt (Shodan); Won inter-school creative writing contests; **Class X topper** in Maths (96%)

CERTIFICATIONS

- Foundations of User Experience (UX) Design by Google
- AI Fundamentals by Google
- Introduction to Cybersecurity & Networking Basics by Cisco Academy
- Java Fundamentals by Oracle Academy & Extended Realities - AR and VR: Udemy
- NoSQL and DBaaS 101: Cognitive Class
- MATLAB Onramp: MathWorks
