ARYA ACHARYA

Bangalore | +91 78925 63754 | B.Tech. Graduate (2026) **seeking full-time** roles

Portfolio: https://aryakenway.github.io/Personal-Portfolio/

LinkedIn: https://www.linkedin.com/in/arya-acharya | GitHub: https://github.com/AryaKenway | aryaacharya2500@gmail.com

SKILLS

Proficiencies: Agentic AI, Microcontroller Programming, RAG, Software Design Patterns, Technical Art, UX Research, Agile Methodology, Software Testing, Low-Level Design

Languages & Frameworks: C#, GDScript, Python, HTML5, Java, MySQL, React.js, Tailwind CSS, UE Blueprints

Tools: Aseprite, Arduino IDE, Figma, Selenium, Tinkercad, Unity Engine

Design: UI/UX Design, Level Design, Narrative & Story Design

DevOps: Docker, Git, GitHub, Jira

POST-DEGREE EXPERIENCE

Walmart Global Tech India - UX Designer Intern — March 2026 – Present

Project 1 - Traffic Sense: An analytics dashboard for site merchants, enabling data-driven decisions to improve sales and product visibility.

Project 2 - Item Insights: An AI-Powered intelligence dashboard providing merchants with a comprehensive 360-degree view of every product across the catalog.

Key Contributions:

- Interpreted **Figma designs** and conducted heuristic evaluations to identify usability issues and recommend design modifications that enhanced the overall user experience
- Designed and developed interactive prototypes using **Figma** and **Vite + React.js + Tailwind CSS**
- **Version control**, **modularity,** and **cross-device responsive design** ensured across all files in these projects
- Maintained company's design system components and tokens throughout these projects
- Performed accessibility testing using **VoiceOver and WAVE**

Project 3 - AI Navigator for Designers: A guide for designers to optimize prompts, reduce token consumption and enhance AI assisted frontend development/prototype workflows

Key Contributions:

- Performed **primary research** on UX Designers to understand their pain points and **secondary research** through documentations and online resources to narrow down content decisions
- Resource content covered **token optimization**, **reducing AI hallucinations**, setup for **agentic AI workflow** and best prompting practices

Organizational Initiatives:

- Led the planning and execution of neurodiversity and accessibility awareness events for Walmart

PRE-DEGREE EXPERIENCE

Red Panda Games Studio - Game Designer and Developer Intern — November 2024 - June 2025

Project 1: Aura Beam

- Designed 20+ game levels using **Unity Engine** and performed **usability and edge-case testing**
- Refined the game's UI to ensure a clean, intuitive and user-friendly layout
- Worked with **shader graphics** and **particle effects** for game assets to enhance visual elements

Project 2: Age of Clashes

- Utilized **Figma** for game dialogues storyline development, enhancing narrative experience
- Fine-tuned troop and building interactions by adjusting hit points, counter mechanics, and damage values to ensure balanced gameplay
- Spearheaded case studies on relevant industry games and documented key design elements and mechanics that could be effectively adapted and implemented

Stipe Solutions Private Limited - Augmented Reality Researcher Intern — April 2025 - June 2025

- Researched AR development using Meta Quest and Unity, focusing on real-time interaction and user experiences
- Implemented a simple integration where user inputs from a phone were enhanced with hand gestures and overlay elements using **Microsoft ClipChamp**

Hitachi India Private Limited - Software Engineer Intern — April 2024 - June 2024

- Implemented stack and queue data structures in Unity
- Made a live weather forecast project using Weather Api
- Exported and tested models in Unity and Blender

ACADEMIC PROJECTS

Discord Rich Presence - YouTube Music

Syncs YouTube Music playback to the Discord status through a Node.js bridge and a browser extension

- The system performs live synchronization of song titles and artist names
- It includes a smart timer that calculates elapsed and remaining playback time

JoPolik - The Super Experience

Developed an educational multiplayer game combining 2D platforming and 3D exploration

- Integrated Photon PUN networking, player animations, NPC interactions and reward mechanics for player engagement
- Implemented DSA-based question system with progression and procedural world generation for replayability

EDUCATION

Degree	Institute	Year	Grade
B.Tech. in Computer Science	Christ University, Bangalore	2026	8.8
Pre-University (PCMC)	Christ Junior College, Bangalore	2022	80%
Class X	PPEC, Bangalore	2020	93%

ACHIEVEMENTS

- Presented a **research paper** for Visualization of Search & Sort Algorithms (VSS) in FED Global Conference
- Secured **Merit Scholarship** (2025-26) from Christ University
- Finalist in GenAI hack fest 2025 organized by CMR Institute of Technology
- Secured First Place in Battle of Brains (Dept. of CSE); Secured **95% in CSE** (PUC); **Class X topper** in Maths
- Secured Black Belt (Shodan), Runner up in all style hip-hop battle organized by Battle Rockz

CERTIFICATIONS

- Foundations of User Experience (UX) Design by Google
- Certified Innovator Program - Ideator by Walmart Global Tech
- AI Fundamentals by Google
- Create High Fidelity Designs and Prototypes in Figma by Google
- Introduction to Game Design by California Institute of Arts
- Introduction to Cybersecurity & Networking Basics by Cisco Academy
- Java Fundamentals by Oracle Academy
- NoSQL and DBaaS 101: Cognitive Class
- MATLAB Onramp: MathWorks
